R SI 1-131

REGULATION
NO: R SI 1-131

ORGANIZATION
31 May 1955

**OFFICE OF SCIENTIFIC INTELLIGENCE
STATEMENT OF MISSION AND FUNCTIONS**

Chief, Guided Missiles Division

I. MISSION

The Chief of the Guided Missiles Division will, in accordance with Office research and production priorities, objectives and programs, conduct all-source research and surveillance of information and intelligence concerning foreign research and development directly related to guided missiles; will produce guided missile intelligence for approval by the Assistant Director; will provide advice and support and make recommendations on guided missile intelligence to the Assistant Director, other CIA components and other agencies; and will maintain liaison with the agencies of the Department of Defense and other agencies of the government and keep advised of the level of their intelligence knowledge relative to foreign guided missile research and development. The responsibility of the Chief of the Guided Missiles Division includes intelligence on the development and characteristics and performance capabilities of foreign guided missiles and guided missile systems, but does not include intelligence on quantity production or operational deployment.

II. FUNCTIONS

The Chief of the Guided Missiles Division shall:

- a. Obtain data from open scientific literature, periodicals, information and intelligence reports, special intelligence, de-

briefings, field trips, interrogations and other sources concerning

CONFIDENTIAL

SECRET

all aspects of foreign guided missile research and development programs.

b. Develop, schedule and conduct research, consistent with Office priorities, objectives and programs, in the overall level of development of foreign guided missiles, by areas, by specific countries, by missile categories, by missile types or by specific missiles, or in specific applications, systems or techniques.

c. Produce all-source intelligence, for review and recommendation by the Intelligence Board where required and for approval by the Assistant Director, including:

1. Contributions to National Intelligence Estimates and Surveys, and critiques of contributions produced by other agencies.

2. Scientific Intelligence Reports, Scientific Intelligence Research Aids, Scientific Intelligence Digests, Scientific Intelligence Memoranda, briefings and debriefings, and items for current intelligence publications.

3. Special estimates, reports and evaluations as requested by other components and agencies.

d. Correlate and evaluate all-source guided missile research and development intelligence produced by other intelligence agencies, to meet the needs of the Assistant Director and other components of CIA in fulfillment of their assigned responsibilities.

e. Coordinate activities with the DD/I Coordinating Officer for Guided Missiles, other OBI Divisions, OER, OCI, and other CIA components on matters of mutual interest.

SECRET

f. Through liaison, meetings, conferences, working groups, and committees, work with representatives of other CIA components, other intelligence and consumer agencies to provide scientific and technical intelligence support, to exchange information, to keep advised of the level of intelligence knowledge, and to insure complete intelligence on foreign guided missile research and development programs.

g. Arrange, in accordance with Agency and Office regulations, for the conduct of external projects and for the use of consultants in support of the Division mission.

h. In collaboration with the Intelligence Production Staff, provide all-source current scientific and technical intelligence indicators in the guided missile field as needed by the Assistant Director, OCI, and other components of CIA.

i. Establish and maintain necessary collection requirements, targets, priorities lists and guides in the guided missile research and development field for the collecting components of CIA and other Agencies, and provide appropriate assistance in the form of assessment, evaluation and guidance in support of the collection activities in this field.

j. Provide advice and make recommendations to the Assistant Director on methods of improving the coordination and other activities of the guided missile research and development intelligence effort of the Federal departments and agencies related to national security.

k. Provide appropriate advice to the Assistant Director, and other components of CIA as requested, on requirements served on CIA for intelligence and intelligence information on foreign guided missile

SECRET

SECRET

1. Advise and assist in the programming of intelligence research in the basic sciences as is necessary to support the national intelligence objectives concerning guided missiles.

a. Study and develop techniques and methods relating to the guided missile research and development intelligence process and make recommendations thereon to the Assistant Director.

a. Provide support of and advice to field activities engaged in the collection of information on foreign guided missile research and development programs, including the furnishing and support of divisional representatives to activities outside of CIA headquarters as required and when approved by the Assistant Director.

c. With the approval of the Assistant Director, and with the support of other components of CIA, assure that Division personnel maintain current and detailed knowledge of US guided missile research and development activities through published information, orientation trips and training courses.

p. As required by the DD/I Coordinator for Guided Missiles, assist in organizing and provide membership and staff assistance to appropriate Agency and Interagency guided missile intelligence committee or Working Groups.

q. Serve as a member of the Intelligence Board and, on a rotating basis, of the OSI Career Service Board and other boards as directed.

r. Carry out special assignments as requested by the Assistant Director for Scientific Intelligence.

ORGANIZATION

RESCISSIONS: OSI Notice 20-190-39, dated 13 August 1954.
OSI Notice 250-100-2, dated 22 March 1954.

1. Effective this date there is established within the Office of Scientific Intelligence a Guided Missiles Division. [redacted] is designated Chief of the new division.

25X1A

25X1A

2. Personnel as indicated at TAB A are detailed to the Guided Missiles Division. Effective dates of transfer will be agreed upon between Chief, Guided Missiles Division and other Division Chiefs concerned, but in no case later than 15 April 1955. No formal changes in Office T/O will be made to reflect these changes pending a trial period not to exceed six months.

3. Missions and Functions of the new division are being developed and will be circulated for comment in the near future. All Division and Staff Chiefs are requested to cooperate fully with the Chief, Guided Missiles Division in meeting this new Office responsibility.

4. In consequence of the above and in view of the completion of its assigned task, [redacted] is terminated this date.
